***Reissue Application***

This application is objected to under 37 CFR 1.172(a) as lacking the written consent of all assignees owning an undivided interest in the patent. The consent of the assignee must be in compliance with 37 CFR 1.172. See MPEP § 1410.01.

A proper assent of the assignee in compliance with 37 CFR 1.172 and 3.73 is required in reply to this Office action.

***Claim Rejections - 35 USC § 112***

Claims 17-38 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The original patent disclosure only appears to support the gas conditioning means being positioned in the return channel (see Column 1, lines 66-67; Column 3, lines 21-26 and 49-58; Column 4, lines 6-15 no other mention of the positioning of the gas conditioning means). This does not provide sufficient support for the newly broadened limitation of a gas conditioning means which may be positioned effectively anywhere and therefore it does not appear that applicant was in possession of such at the time of the invention.

Claims 17-38 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to

which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 17-38 are not enabled given the lack of description.

***Oath/Declaration***

The reissue oath/declaration filed with this application is defective (see 37 CFR 1.175 and MPEP § 1414) because of the following:

The reissue oath/declaration filed with this application is defective because the error which is relied upon to support the reissue application is not an error upon which a reissue can be based. See 37 CFR 1.175(a)(1) and MPEP § 1414.

***Claim Rejections - 35 USC § 251***

Claims 1-38 are rejected as being based upon a defective reissue Declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175. The nature of the defects in the Declaration is set forth in the discussion above in this Office action.

Claims 17-38 are rejected under 35 U.S.C. 251 as being based upon new matter added to the patent for which reissue is sought. The added material which is not supported by the prior patent is as follows: The original patent disclosure only appears to support the gas conditioning means being positioned in the return channel (see Column 1, lines 66-67; Column 3, lines 21-26 and 49-58; Column 4, lines 6-15 no other mention of the positioning of the gas conditioning means). This does not provide sufficient support for the newly broadened limitation of a gas conditioning means which may be positioned effectively anywhere and therefore it does not appear that applicant was in possession of such at the time of the invention.

***Conclusion***

Applicant is reminded of the continuing obligation under 37 CFR 1.178(b), to timely apprise the Office of any prior or concurrent proceeding in which Patent No. 6,354,196 is or was involved. These proceedings would include interferences, reissues, reexaminations, and litigation.

Applicant is further reminded of the continuing obligation under 37 CFR 1.56, to timely apprise the Office of any information which is material to patentability of the claims under consideration in this reissue application.

These obligations rest with each individual associated with the filing and prosecution of this application for reissue. See also MPEP §§ 1404, 1442.01 and 1442.04.
